

Jie Chen

Mobile: (480) 241-8369

Email: jie.chen@northwestern.edu

Address: 2145 Sheridan Road, Evanston, IL 60208

[Google Scholar Page](#)**EDUCATION**

- 2018.8 - 2022.3 **Ph.D. in Mechanical Engineering**
 Arizona State University (ASU), Tempe, AZ, USA
 Thesis: Uncertainty quantification and prognostics using Bayesian statistics and machine learning
 Advisor: Professor Yongming Liu
- 2015.9 - 2018.3 **M.S. in Civil Engineering**
 Beihang University, Beijing, China
 Thesis: Experimental study on fatigue performance of corroded steel reinforcement
 Advisor: Professors Bo Diao and Jingjing He
- 2011.9 - 2015.6 **B.S. in Civil Engineering**
 Beihang University, Beijing, China
 Thesis: Degradation law of carrying capacity of bending reinforced concrete section with fatigue damage
 Advisor: Professor Bo Diao

PROFESSIONAL EXPERIENCE

- | | | |
|------------------|---|---|
| 2022.4 - present | Northwestern University | Postdoctoral Fellow
Advisor: Professor Wei Chen |
| 2023.1 - 2023.3 | Northwestern University (NU) | Assistant Instructor |
| 2018.8 - 2022.3 | Arizona State University | Research Assistant |
| 2018.3 - 2018.7 | China Academy of Engineering Physics | Visiting Scholar |

AWARDS

- 2023.10 Travel award for the Future Faculty Symposium at Society of Engineering Science Conference
- 2023.8 Third Prize in the Data Hackathon on “Automating Material Selection for Product Design” at ASME IDETC-CIE Conference
- 2023.3 NSF travel award for REMADE Conference
- 2023.2 Wiley Top Cited Article 2021-2022 (Publication [8])
- 2022.2 AIAA SciTech 2022 Aerospace Design & Structures Student Paper Competition Semi-finalist
- 2021.11 Dean’s Dissertation Award in the Ira A. Fulton Schools of Engineering, ASU
- 2019.9 PHM Doctoral Symposium participant (One of 10 selected PhD students)
- 2018.3 Beijing Excellent Graduate (Top 5 out of 88, Ranking 1), Beihang University
- 2018.3 Best Thesis of Beihang University (Top 3 out of 88)
- 2016.11 Graduate Scholarship Award (Top 4 out of 21)
- 2016 & 2014 Merit Student of Beihang University

2014.9 Scholarship for Academic Excellence

POSTERS

1. Crack-surface Analysis of Elastomers Using Transfer Learning, Annual Meeting of Center for Hierarchical Materials Design, Chicago, IL, 2022
2. Multimodality Information Fusion for Aging Pipe Strength and Toughness Estimation Using Bayesian Networks, Annual Conference of the Prognostics and Health Management Society, Scottsdale, AZ, 2019

RESEARCH EXPERIENCE

1. NU-Johns Hopkins University-Carnegie Mellon University-Georgia Institute of Technology-Purdue University-University of California at Santa Barbara-University of Massachusetts Lowell Collaboration Funded by **DEVCOM ARL**: High-throughput Materials Discovery for Extremes 2023-present
 - Developing multi-scale uncertainty quantification methods
2. NU-University of Wyoming-Lehigh University Collaboration Funded by **NSF**: Microscopic Mechanism of Surface Oxide Formation in Multi-Principal Element Alloys 2023-present

- Developing an automated element prediction method from density of state using convolutional neural networks
 - Supervised a research assistant and an undergraduate student for design rule discovery
 - Wrote annual reports
3. NU-The Ohio State University-Case Western Reserve University-North Carolina Agricultural and Technical State University-The University of Tennessee Knoxville Collaboration Funded by **NSF: Hybrid Autonomous Manufacturing, Moving from Evolution to Revolution (HAMMER)** Engineering Research Center 2022-present
 - Supervising a Ph.D. student for process-property analysis and design using Bayesian Long Short-Term Memory Networks and Bayesian Optimization
 4. NU Internal Collaboration Funded by **International Institute for Nanotechnology at NU: Adaptive Sampling and High Throughput Data Analysis for Nanostructure Mega-Libraries** 2022-present
 - Proposed a physics-based machine learning framework for multi-view classification of crystal structures from diffraction patterns
 - Developing an automated materials screening for catalyst design using Deep Learning based Bayesian optimization
 - Supervising a Ph.D. student and an undergraduate student for crystal boundary identification using rule-based and machine learning methods
 5. NU-Michelin Collaboration Funded by **DOE-ReMADE-Michelin: Development of Instruments and Techniques that Can Assess Tire Life and Increase Re-Manufacturing of Commercial Vehicle Tires** 2022-present
 - Supervising a Ph.D. student for method development on defect prediction of tires with imbalanced dataset
 6. NU-Hyundai Motor Company Collaboration Funded by **Hyundai: Machine Learning and Bayesian Optimization for improving Electric Vehicle Systems** 2022-present
 - Supervising a Ph.D. student and a master student for method development on Machine Learning and Bayesian Optimization for accelerate life testing
 7. NU-Ford Motor Company Collaboration Funded by **Ford-Northwestern Alliance: Deep-Learning Computer Vision Techniques for Optimal Design of Toughened Polymers** 2022-2023
 - Supervising a Ph.D. student for paper writing
 - Supervised an undergraduate student for automated microstructure-property prediction using transfer learning
 8. ASU-Carnegie Mellon University-Optimal Synthesis, Inc.-Southwest Research Institute-Vanderbilt University Collaboration Funded by **NASA: Information Fusion for Real-Time National Air Transportation System Prognostics under Uncertainty** 2021-2022
 - Proposed a multi-fidelity data aggregation method using convolutional neural networks
 - Proposed Physics-Guided Mixture Density Network for regression analysis and uncertainty quantification with arbitrary data distribution
 - Proposed a neural network-based approach for optimizing neural network models
 9. ASU-Technical Data Analysis, Inc. Collaboration Funded by **NAVAIR: Systematic Fatigue Test Spectrum Editing Using Wavelet Transformations** 2019-2022

- Proposed a physics-guided machine learning method for fatigue life modeling of additively manufactured Ti-6Al-4V considering the missing data problem
 - Proposed a piecewise stochastic rainflow counting method for probabilistic linear and nonlinear damage accumulation considering loading and material uncertainties
 - Generated and edited uniaxial and multiaxial fatigue loading spectrums, and experimentally tested fatigue lives of specimens
 - Supervised 3 master students for method development on fatigue life prediction
 - Wrote quarterly reports
10. ASU-University of Connecticut Collaboration Funded by **NSF**: Fatigue Damage Prognosis for Slender Coastal Bridges 2018-2020
- Proposed Probabilistic Physics-guided Neural Network for fatigue data regression
 - Proposed a novel Hierarchical Bayesian data augmentation method for fatigue stress-life curves with uncertainty quantification considering sparse data problem
 - Wrote project reports
11. ASU-Gas Technology Institute Collaboration Funded by **DOT** PHMSA: Uncertainty Quantification and Reduction for Pipeline Assessment with Interactive Threats 2017-2020
- Developed Bayesian model averaging approach for pipe strength prediction from multimodality surface measurements with uncertainty quantification
 - Supervised 1 Ph.D. student for method development on strength prediction using Bayesian networks
 - Wrote quarterly reports

PROFESSIONAL ACTIVITIES AND SERVICE

Contributions to Research Grants

1. International Institute for Nanotechnology (IIN) Physics-Informed Machine Learning for High Throughput Data Analysis of Nanostructure Mega-Libraries (NU, funded)
2. Navy Small Business Technology Transfer (STTR) N20A-T002 Machine Learning Tools to Optimize Metal Additive Manufacturing Process Parameters to Enhance Fatigue Performance of Aircraft Components (ASU, funded)
3. Defense Advanced Research Projects Agency (DARPA) DARPA-SN-23-73 Rapid Part Qualification (NU, pending)
4. Department of Energy (DOE) DE-FOA-0002958 Scientific Machine Learning for Complex Systems (NU, not funded)
5. National Science Foundation (NSF) NSF 22-559 Boosting Research Ideas for Transformative and Equitable Advances in Engineering (BRITE) (ASU, not funded)
6. Navy Small Business Innovation Research (SBIR) N221-067 Digital Engineering - Improved Reliability of Composites Pi-Joints for Use in Primary Aircraft Structures (ASU, not funded)
7. Air Force Collaboration for Innovative Research on Aircraft Structure (CIRAS) FA8650-21-S-2205 Probabilistic Physics-informed Machine Learning for Mechanical Property Prediction of Additively Manufactured Components (ASU, not funded)

Professional Society Memberships

1. American Institute of Aeronautics and Astronautics (AIAA) Non-Deterministic Approaches Technical Committee

2. AIAA Young Professional Group
3. The American Society of Mechanical Engineers (ASME)

Paper Reviewing

Journals

1. Fatigue & Fracture of Engineering Materials & Structures
2. International Journal of Fatigue
3. International Journal of Mechatronics and Manufacturing Systems
4. Journal of Bridge Engineering
5. Journal of Computing and Information Science in Engineering
6. Journal of Materials Processing Technology
7. Journal of Mechanical Design
8. Journal of the Royal Statistical Society: Series C
9. Journal of Zhejiang University-SCIENCE A
10. Mathematical Biosciences and Engineering
11. Multidiscipline Modeling in Materials and Structures
12. Nature Communications
13. Reliability Engineering & System Safety

Conferences

14. ASME IMECE Conference
15. ASME Turbo Expo Conference

Laboratory Management

Experiment equipment management and maintenance (Micro CT system - Skyscan 1272, MTS Landmark Servohydraulic Test Systems, MTS electron-mechanical testing machine, Zeiss EVO scanning electron microscope, FLIR high resolution thermal camera, etc.)

MENTORING ACTIVITIES

Postdoc/Student Mentor

Industry

1. Dr. Dong Hyun Ha, Hyundai Motor Company, 2022 – 2023

Ph.D. students

2. Vispi Karkaria, Mechanical Engineering, NU, 2022 – present
3. Tuba Dolar, Mechanical Engineering, NU, 2023 – present
4. Umar Farooq Ghumman, Mechanical Engineering, NU, 2022

Research assistant

5. Zhuoxin (Joy) Sun, Mechanical Engineering, NU, 2023

Master students

6. Julian Delgado, Mechanical Engineering, NU, 2023 – present
7. Vinamra Saxena, Mechanical Engineering, NU, 2022 – present
8. Shih-Chuan Tien, Mechanical Engineering, ASU, 2019 – 2021
9. Sushant Shivankar, Mechanical Engineering, ASU, 2019 – 2021
10. Antriksh Sharma, Mechanical Engineering, ASU, 2019 – 2021

Undergraduate students

11. Cesar Fuentes, Computer Engineering, University of Illinois Chicago, 2023 – present
12. Genmao Zhunag, Mechanical Engineering, NU, 2023
13. Michael Clark, Mechanical Engineering, NU, 2022
14. Luke Hase, Mechanical Engineering, ASU, 2021 – 2022
15. Newton Tam, Mechanical Engineering, ASU, 2021 – 2022

TEACHING ACTIVITIES**Certificate**

Center for the Integration of Research, Teaching and Learning (CIRTL) Associate, NU, 2023

Assistant Instructor

1. ME 341 Computational Methods for Engineering Design (prepared slides, homework, quiz, and projects, grade, and gave lectures), NU, 2023
2. Engineering Design Under Uncertainty (gave lectures to Lab), NU, 2023
3. MAE 548 Probabilistic Methods for Engineering Design and Analysis (gave lectures on fundamental probability and Bayesian statistics), ASU, 2022
4. ASU 101 The ASU Experience (led lab tours), ASU, 2022

WORKSHOPS

1. Artificial Intelligence for Materials Science workshop, online, National Institute of Standards and Technology, 2023
2. Mentored Discussions of Teaching, Northwestern University, 2023
3. Artificial Intelligence for Materials Science, online, National Institute of Standards and Technology, 2022
4. Machine Learning for Materials Research, online, University of Maryland, 2022
5. Responsible Conduct for Research Training, online, Northwestern University, 2022
